

# MEET OUR COMMITTEES

Just as the nuclear sector thrives through a large and varied pool of specialists, so too does NAYGN, with the varied **committees** that make our **four organizational pillars**. Your participation is the backbone of our organization!

## PROFESSIONAL DEVELOPMENT (PD)

Continuous learning for the nuclear workforce is supported by education through **Webinars**, **PD programs** such as the Atomic Mentoring Program (AMP), and event planning in **Conferences**, none of which would be possible without **Fundraising** or **Technology** supporting NAYGN's digital infrastructure.

## PUBLIC INFORMATION (PI)

Engaging the public in nuclear **Advocacy** conferences, empowering youth via **Student Outreach**, searching out **Clean Energy** initiatives, and communicating with government officials through **Government Outreach**, the PI pillar is replete with opportunities to showcase passion and knowledge of nuclear. If your talents are more digital, look to **Publications** and **Media** production!

## KNOWLEDGE TRANSFER & RETENTION (KTR)

Do you want to uphold the legacy of NAYGN now and in the future? If so, the KTR pillar subcommittees might be right for you. Good practices and exceptional achievements by NAYGN members are highlighted in the form of **Awards**, and **Benchmarking** checks the health of the whole organization through surveys and reports. Former presidents of NAYGN contribute to the shape and continuity of NAYGN by weighing in on **Bylaws & Rules** and by ensuring **Sustainability** in collaboration with the NAYGN board.

## NETWORKING

Building connections between our members is the core aspect of this pillar, and is achieved by **Engagement** with our members through contests and internal initiatives, building strong connections with international nuclear groups through **International Relations**, and updates on NAYGN highlights and achievements through our **Social Media** accounts.
